Introduction

The Mobile Treatment Device or MTD can handle multiple causes of symptoms simultaneously. The treatment is focused on the elimination of bacteria, viruses, parasites, fungi and yeasts.

Method

For an extensive description see “Manual for Private Individuals MTD”. Read the desired setting from the table and use the following sequence:

1. Set LF / HF (frequency band) switch to correct position.
2. Turn frequency F to correct value.
3. Set SW / NO (sweep) switch to correct position.

Treatment Schedule

Use the following treatment schedule:

1. Treatment day 1, use F(1) during 15-20 minutes.
2. Take 2 or 3 days rest.
3. Treatment day 2, use F(2) during 15-20 minutes.
4. Take 2 or 3 days rest.
5. Treatment day 3, use F(3) during 15-20 minutes.
6. Take 2 or 3 days rest.
7. Treatment day 4, use F(4) during 15-20 minutes.
8. Repeat sequence above until complaints disappears.

If the frequency is not filled at F(2), F(3) or F(4), then the circle in the treatment schedule is obviously smaller. Always keep at least 2 days rest between multiple treatments.

These basic frequencies generate many other waves that treat the causes of the selected symptom. Make sure you drink plenty of water after a treatment so that the waste products produced in your body are discharged.

Below is a list of basic frequencies corresponding a number of common diseases.

Extra Frequencies

Do you have a symptom / complaint not described in this document, contact Don-Neo Technologies via support@don-neo.com and ask for the specific frequencies.
